Protecta-Screen

ENVIRO WALL®

- LIGHTWEIGHT AND STRONG
- SUPERB NOISE REDUCTION
- ENVIRONMENTALLY FRIENDLY
- AUSTRALIAN MADE

A Sustainable, Modular Hoarding System that is Easy to Handle and Install

Enviro Wall® is economical, and environmentally friendly, the ideal solution for your hoarding requirements.

The prefinished, water-resistant surface makes it durable and easy to clean, while the cardboard honeycomb structure makes it strong, but lightweight.

Australian Made from recycled materials, Enviro Wall® is fully recyclable. Best suited to internal projects, Enviro Wall® has been tested as reducing sound by up to 27dB.

Enviro Wall® can be used in freestanding or floor-to-ceiling applications. This system can be easily built up to 5.4m high using standard panels and tracking (for walls higher than 5.4m, or custom requirements, contact a Protecta Specialist).

The Enviro Wall® system is compatible with our range of aluminum powder coated tracking and door units (single and double door options) to complete the system. See over page for codes and dimensions of the system components.
