

Protecta-Dust

# HEPA 300

## ADVANCED HEPA FILTRATION

- FILTERS 99.97% OF PARTICLES 0.3 MICRONS OR MORE
- CONNECTS TO STANDARD DUCTING WHERE REQUIRED
- USED AS AIR SCRUBBER OR TO CREATE NEGATIVE PRESSURE

The HEPA 300 is a powerful air scrubber and negative pressure unit. It offers high-efficiency air filtration and extreme versatility - all within a small footprint.

With a variable speed of up to 355 CFM, it meets the typical airflow level demanded on small to medium sized jobs.

For larger applications, linking the units together is the perfect solution.

<b>PRODUCT UNIT</b>	<b>CODE</b>
PRE FILTER	HAS300-PF
HEPA FILTER	HAS300-HF

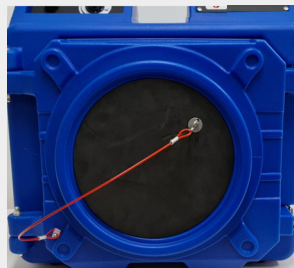

## Product Specifications

Dimensions (HxWxD)	39cm x 55cm x 51cm
Duct Sizes	Intake - 300mm Outlet - 250mm
Weight	11.5kg
Air Movement	Up to 355 CFM
Filter System	2 Stage
Primary Filter	HEPA filtration technology
Filter Change Light	Indicates when it's time to replace one or both filters

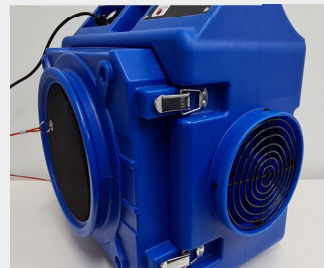

Built-In Microban antimicrobial

Protective Cover

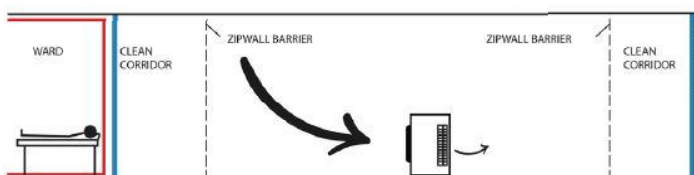

Basic Control Valve

Lightweight & Portable

## HEPA 300 - used as air scrubber

## HEPA 300 - used to create negative pressure
