

# Protecta-Sound Acoustic Curtains

## Facing issues with noise?

### Acoustic Curtains

- Noise reduction up to 32dba
- Excellent sound absorption
- Weatherproof
- Flame retardant
- Easy to transport
- Velcro join providing tight vertical seal
- Multiple eyelet holes for ease of installation

**"Protecta-Sound does it again!**  
We utilised the Protecta-Sound curtains/panels on a sensitive project in the Sydney CBD. We had **equipment running within 10 metres of small businesses and hotels** and previously because of the noise levels we had restricted working hours. After utilising and building a series of temporary walls using the Protecta-Sound panels, **we lowered the noise levels by more than 20dba, resulting in the restrictions being lifted and enabling us to work longer hours.** Thanks Protecta"
